

SUPPLIER VALUE ANALYSIS & VALUE ENGINEERING

Supplier Engagement is one of the foundational elements for VAVE at Lennox International. LII collaborates closely with suppliers in product development, cost reduction and establishing a healthy supply chain.

In the recent years, LII VAVE Team has worked with suppliers on many opportunities including:

- Designing components changes to meet LII's functional requirements
- Identifying leaner assembly process to make a positive productivity impact at supplier manufacturing locations
- Designing better packaging to ensure reduced damage from supplier to LII sites.
